Awareness on nutrition week and dental camp

Date: 08.09.2017

Venue: Agraharam

Faculty: Dr. Srinivas, Dr. Siva

Organising agency: Gram Panchayat

Number of students attended: 12

SUMMARY:

National Nutrition Week 2021: It spreads awareness about nutrition, its importance in our lives, and how to curb the problem of malnutrition. So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was given with main focus on nutrition. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the villagers and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

World Sight day and dental camp

Date: 14.10.2017

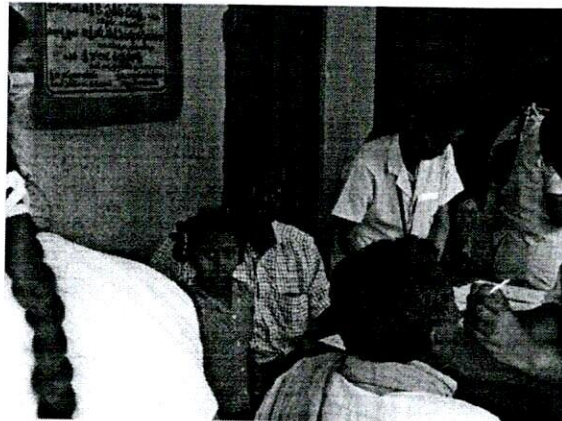

Venue: Kollamuri

Faculty: Dr. Srinivas Rao, Dr. Siva
Organising agency: ZPH School

Number of students attended: 12

SUMMARY:

Prevent Blindness is participating in “**World Sight Day**” by offering actions you can take to care for your eyesight and the eyesight of others. World Sight Day is an international day of awareness, held annually on the second Thursday of October, to focus attention on the global issue of eye health. Coordinated by the **International Agency for the Prevention of Blindness (IAPB)**, this year’s World Sight Day theme is “Love Your Eyes.” So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was given with main focus on the importance of eyesight. Individuals were examined and oral hygiene instructions were given accordingly. About 120 patients were screened and referred to the hospital for the treatment. There was a good response from the villagers and they appreciated the team for their services. The students who participated in the camp were happy for their work and got.

awareness on relation between diabetes and oral health and dental camp

Date: 15.11.2017

Venue : Paradesipalem

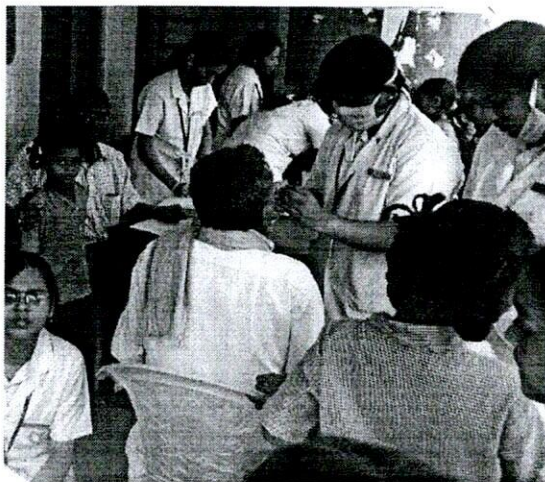

Faculty: Dr.Siva, Dr.Srinivas

Organising agency: Gram Panchayat

Number of students attended: 15

SUMMARY:

People with diabetes have a higher chance of having periodontal (gum) disease, an infection of the gum and bone that hold the teeth in place. Periodontal disease can lead to pain, bad breath that doesn't go away, chewing difficulties, and even tooth loss. Diabetes can also slow down healing, so it can interfere with treatment of periodontal disease. So in order to increase this awareness camp was conducted by Anil Neerukonda Institute of Dental Sciences. Oral health education was given. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the villagers and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

Awareness on energy conservation and dental camp

Date: 18.12.2017

Venue : Reddipalli

Faculty: Dr. Siva, Dr. Manish

Organising agency: Village Panchayat

Number of students attended: 15

SUMMARY:

Energy conservation is the effort made to reduce the consumption of energy by using less of an energy service. This can be achieved either by using energy more efficiently (using less energy for a constant service) or by reducing the amount of service used (for example, by driving less). Energy conservation is a part of the concept of Eco-sufficiency. **Energy conservation measures** (ECMs) in buildings reduce the need for energy services and can result in increased environmental quality, national security, personal financial security and higher savings.^[1] It is at the top of the sustainable energy hierarchy. It also lowers energy costs by preventing future resource depletion. So in order to increase this awareness camp was conducted by Anil Neerukonda Institute of Dental Sciences. Oral health education was given. Individuals were examined and oral hygiene instructions were given accordingly. About 120 patients were screened and referred to the hospital for the treatment. There was a good response from the villagers and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

awareness on sanitation and dental camp

Date: 26.12.2017

Venue : Thatichetlapalem

Faculty: Dr.Siva, Dr.Srinivas

Organising agency: Paradesamma temple trust

Number of students attended: 14

SUMMARY:

UNICEF estimates that **2 million children die every year from pneumonia and diarrhea**—and these two illnesses can be largely prevented with safe drinking water and improved sanitation and hygiene. Without proper toilets, water and the environment become contaminated, and diseases like diarrhea spread more rapidly. So in order to increase this awareness camp was conducted by Anil Neerukonda Institute of Dental Sciences. Oral health education was given. Individuals were examined and oral hygiene instructions were given accordingly. About 190 patients were screened and referred to the hospital for the treatment. There was a good response from the villagers and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

World braille day and dental camp

Date: 04.01.2018

Venue : Siripuram

Faculty: Dr.Srinivas Rao

Organising agency: Anil Neerukonda Institute of Dental Sciences

Number of students attended: 14

SUMMARY:

Braille is a tactile representation of alphabetic and numerical symbols using six dots to represent each letter and number, and even musical, mathematical and scientific symbols. Braille (named after its inventor in 19th century France, Louis Braille) is used by blind and partially sighted people to read the same books and periodicals as those printed in a visual font. Braille is essential in the context of education, freedom of expression and opinion, as well as social inclusion, as reflected in article 2 of the Convention on the Rights of Persons with Disabilities. So in order to increase this awareness camp was conducted by Anil Neerukonda Institute of Dental Sciences. Oral health education was given. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

Oral cancer awareness and dental camp

Date: 03.02.2018

Venue: Peddapalem

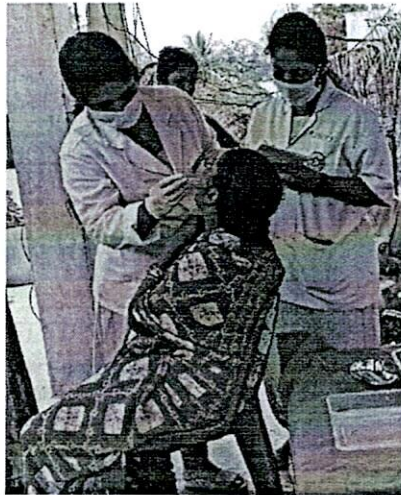

Faculty: Dr. Sushanti, Dr. Srinivas
agency: gram panchayat

Organising

Number of students attended: 14

SUMMARY:

Many of oral health problems are preventable and we all are well versed with the quote 'prevention is better than cure'. So in order to increase this awareness camp was conducted by Simhachalam. Oral health education was given with main focus on awareness on cancer and its relation with tobacco. Individuals were examined and oral hygiene instructions were given accordingly. About 120 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

World autism awareness day and dental camp

Date: 02.03.2018

Venue : Akkivaram

Faculty: Dr.Srinivas Rao, Dr.Nagarjuna

Organising agency: Village Panchayat

Number of students attended: 12

SUMMARY:

World Autism Awareness Day is an internationally recognized day on April 2 every year, encouraging Member States of the United Nations to take measures to raise awareness about people with Autism Spectrum Disorder throughout the world. So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was given. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

systemic health and oral diseases awareness and dental camp

Date: 04.04.2018

Venue : Tharluwada

Faculty: Dr.Srinivas Rao

Organising agency: Gram Panchayat

Number of students attended: 15

SUMMARY:

The oral cavity is the intersection of medicine and dentistry and the window into the general health of a patient. Hundreds of diseases and medications impact the oral cavity, and pathologic conditions in the mouth have a greater systemic impact than many providers appreciate. So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was given. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

awareness on safe drinking water and dental camp

Date: 16.04.2018

Venue : Dondaparthi

Faculty: Dr.Siva, Dr.Manish, Dr.Srinivas

Organising agency: Satya Sai Seva Trust

Number of students attended: 16

SUMMARY:

Water is one of the world's most precious resources. People use water every day for many activities, such as drinking, bathing, recreation, agriculture, cooking, manufacturing, and medical uses. So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was given and note on safe drinking water is given. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

awareness on immunisation week and dental camp

Date: 27.04.2018

Venue : Kapuluppada

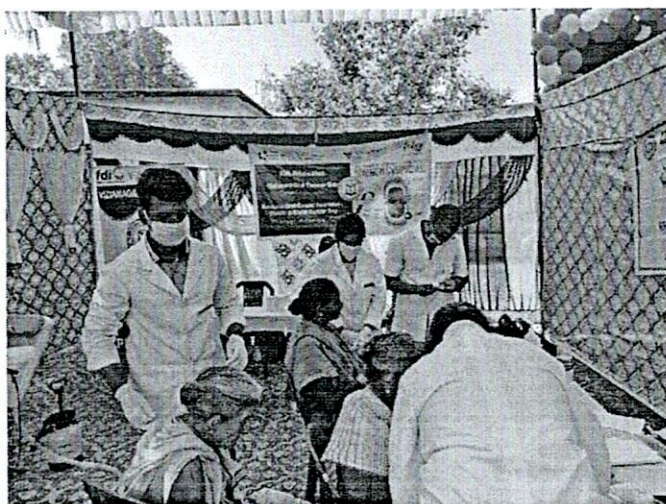

Faculty: Dr. Manish, Dr. Siva

Organising agency: ZPH School

Number of students attended: 12

SUMMARY:

Immunization saves millions of lives and is widely recognized as one of the world's most successful and cost-effective health interventions. Vaccines save up to 3 million lives each year worldwide from infectious diseases, such as hepatitis, diphtheria, tetanus, pertussis (whooping cough), measles and polio. So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was given and note on importance of vaccination is given. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

International labour day and dental camp

Date: 01.05.2018

Venue : Venkpojipalem

Faculty: Dr.Nagarjuna, Dr.Srinivas Rao

Organising agency: Anil Neerukonda Institute of Dental Sciences

Number of students attended: 12

SUMMARY:

Labor Day signifies various things for many in the United States of America: a long holiday weekend, a barbeque by the pool, the unofficial end of summer, the start of a new school year, and discounts at our favorite stores. Nevertheless, Labor Day honors the American Labor Movement. So in order to increase this awareness camp was conducted by the Department of Public health Dentistry, Anil Neerukonda Institute of Dental Sciences. Oral health education was. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.

mega dental screening & treatment camp

Date: 17.05.2018

Faculty: Dr. Siva, Dr. Srinivas

Venue: Aptech, Dwarakanagar

Organising agency: APTECH computers

Number of students attended: 12

SUMMARY:

Many of oral health problems are preventable and we all are well versed with the quote 'prevention is better than cure'. So in order to increase this awareness camp was conducted by APTECH Computers. Oral health education was given with main focus on awareness on cancer and its relation with tobacco. Individuals were examined and oral hygiene instructions were given accordingly. About 100 patients were screened and referred to the hospital for the treatment. There was a good response from the staff and they appreciated the team for their services. The students who participated in the camp were happy for their work and got motivated.
